Mrs. Robinson Laid To at High River, Alta.

The funeral of Alice Christine Robinson, beloved wife of J. W. Robinson, J.P. of Oyen, was held in High River, Alta., on Saturday, August 12, in the United church, and interment followed in Highwood cemetery. Rev. Alex. Rennie of High River, officiating. Among the many who attended the funeral the following were present from Oyen: Mr. and Mrs. R. J. Scott, Miss Florence Munn, Miss A. M. Todd and Mr. J. W. Snell. The pallbearers were Mr. Malcolm McInnes, Calgary, Mr. Clark, Mr. Ayres, Mr. R. Wallace and Mr. M. Sanders, High River and Mr. Eaglesham of Cayley, Alta.

Mrs. Robinson died in High River hospital, Wednesday, August 9, 1933, following a brief illness. She was visiting her sister-in-law, Mrs. A. N. Robblee at Cayley when she became seriously ill and was taken to High River hospital. In response to a telegram her husband left Oyen Sunday morning and was with her from noon that day until the end.

The deceased was born in Singshington, Ont., June 18, 1861. In early childhood she moved with her parents to Winnipeg, where she was educated and qualified for the teaching profession, which she loved and followed to the last, and in which she won honorable mention in every school in which she taught. Mrs. Robinson came to Oyen in 1916, and making her home here taught all until the end of last term.

Besides her husband she leaves to mourn her loss, a sister in Los Angeles, Calif., Mrs. A. Thompson; a sister-in-law in Vancouver, B.C., Mrs. Jas. D. Christie; a number of nephews and nieces and innumerable friends in many parts.

She held in highest esteem by all who knew her and beloved for her bright and happy disposition.

Roger Sullivan, 3 Burned to Death

A fire which occurred in the forenoon, Tuesday, August 15, took toll of one life and destroyed a barn and other buildings, a quantity of stacked feed and some machinery on the farm of J. V. Sullivan, south-east of Oyen.

Clinton (5) and Roger (3) were in the barn playing and started the fire with matches. The older managed to make his escape but the younger boy was trapped and lost his life in the blaze. Mrs. Sullivan the heart-rendered mother was a helpless witness of the tragedy.

Charles Sweeney a neighbor, was early on the scene, but the fire, fanned by a stiff north-west wind had become an inferno, and nothing could be done. At the time of tragedy, Mr. Sullivan was at the farm of Mr. P. A. Watrin.

A funeral service was conducted at the Sullivan home this afternoon, after which the remains were borne to Oyen cemetery for interment. Mr. Fraser of the Acadia Mission Field, conducted the services.

Mrs. A. E. Johnson, who has been seriously ill at her home in Oyen, is reported to be somewhat improved today.

There will be no issue of the News next week.

Oyen School Will Be Re-opened For Fall Term, August 21

At a meeting of Oyen school board held on Monday evening, it was decided to re-open the school for the fall term next Monday, August 21, and the two weeks gained through this arrangement will be added to the Christmas and New Year holidays.

The appointment of a teacher for the Primary room was not made, and since the meeting, Mr. G. P. Freebury, has tendered his resignation, necessitating the engagement of another teacher for grades 6, 7 and 8. The board adjourned to meet on Thursday evening, (August 17).

First Load of 1933 Wheat is Delivered

The first of the 1933 wheat crop to be delivered in Oyen, was brought to town Thursday, August 10, by Arthur Rothwell of Cappon. This wheat was grown on stubble, and the yield yielded fractionally under four bushels to the acre. The load was delivered to the Pool elevator and graded No. 1. W. J. Byler, whose farm is north of Oyen, delivered the next load to the Pool elevator, Friday.

It is, she will be sadly missed, and mourned by many children who were skillfully guided through their primary education under her loving care.

The appended verses by her husband are a tribute to her burial place.

RESTING
In the shadow of the Rockies
Where the noisy willows wave,
And the sparkling streamlets murmur,
As their fretted banks they leave;
Where the warm Chinooks in winter,
Chase the white snows from the plain
Making bare the hills and valleys
So the cattle graze again;
Where the meadow lark and robin
Sing their songs at dawn ere,
As the twittering, little sparrows
For their beds the branches leave:

Where the sunshine smiles upon her,
And the rain drops softly fall,
And beside the purling river
You may hear the curlews call;
Where the lights from Turner Valley
Gild the star bespangled sky,
And the leaves through the tree tops
Chant a mystic lullaby;
Where the high embattled mountains
Sentinel the Golden West,
They have borne my dear beloved
And have laid her there AT REST.

M. D. of Golden Centre

The fifth meeting of the council of the municipal district of Golden Centre No. 272, was held at the N.E. 13-30-5, on Saturday, August 5. Members all present. The financial statement as at July 30, was read and accepted. All accounts presented were passed for payment.

Councillor Cates and Secretary Greene were appointed to attend a meeting of representatives of 13 municipal districts to be held at Chinook to discuss relief etc.

The following resolutions were passed: Whereas gophers have become a real menace to

grain growing in this territory, therefore it be resolved that we recommend that our municipal district in conjunction with other municipal districts, request the government to take necessary steps immediately to protect weasels and badgers in such a manner that these animals will be able to eliminate the gophers, and whereas, on account of poor price of wheat and other farm products in 1932 and 1933 and the complete failure of crops in 1933, therefore it be resolved that we appeal to the government to grant us (free freight on feed and coal to be required by our settlers.

Council adjourned to meet at N.E. 13-30-5, on Saturday, September 2.

The Great Wo-Lo Grain Exhibition and Conference has become a matter of history, but to the thousands of visitors who were privileged to view this wonderful display it will long be remembered as one of their most delightful and instructive experiences. Western Canadians, in particular, who have had the opportunity of visiting the other provinces of their own Dominion, will be well acquainted with the vast agricultural resources and richness of the resources of their country, and will have obtained through the various provincial exhibits a renewed confidence in the future of Canada.

A tour of the British Columbia exhibit could not fail to have impressed one with the amazing wealth of resources in that great province. Divided into three sections, the exhibit depicted first the forest and mineral wealth of the province; then the magnificent fruit products, with their attractive orchard scenes; finally the fisheries whose products are known and in demand the world over.

Broomhall Declares Canadian Wheat Will Always Be At A Premium In Markets Of World

Canada's wheat still stood supreme as the world's grain and so conference came to a close at Regina, Sask., following the biggest wining of the \$100,000 in cash prizes, the Dominion's farmers saw their banner at the top of the mast, with hopes rising that demand for Canadian wheat from foreign countries could cut down the 1933 crop. Experts who attended the conference gave farmers encouragement in disclosing European countries wanted the Canadian grain.

The big share of the price money from all grains went to the Dominion. Its growers took \$64,873, more than double the \$25,538 which went to United States growers and \$8,221 went to farmers in countries other than Canada and the United States. Approximately \$4,000 of the prize money was not awarded because judges felt some entries were not worthy.

A carryover of Canadian wheat of approximately 200,000,000 bushels, as the cereal year ended July 31, compared with 12,962,961 bushels at the same date at the close of the previous cereal year, was a problem for farmers to ponder in view of their export wheat.

But the Canadian growers were given assurance it was not the lack of quality in their product that kept it from being purchased in large quantities on international wheat markets. In a paper to the conference, Britain's noted marketing expert, Broomhall, declared it was protection by foreign countries which caused the difficulties.

All nations, Broomhall disclosed, did not and could not buy Canadian wheat because of high duties and milling restrictions of importing countries. Millers wanted soft wheat, and the conference was told that Canadian wheat will always be at a premium in the markets.

The measure was echoed by other experts. Led by the newly crowned wheat king, Ireland Widdow, of Stavely, and the noted northern grower, Herman Treble, of Wembley, Alberta, capped the greatest share of the prize money to go to Canadians. Alberta's earnings were \$25,152, almost equal to the total amount won by United States farmers.

Saskatchewan was second in the list, bringing \$12,333 with British Columbia, third, earning \$11,427; Ontario, \$7,993; Manitoba, \$5,003, while the balance was spread between Quebec, New Brunswick, Prince Edward Island and Nova Scotia. Earnings of countries other than Canada and the United States were: Australia, \$6,706; Siam, \$741; British Columbia, \$200; New Zealand, \$150; Brazil, \$150; Mexico, \$140; India, \$49; Southern Rhodesia, \$40; India, \$34.

The curtain rang down on the grain show ever held in the Dominion, while proposals were being pressed to establish a permanent bureau of the Federal Department of Agriculture to assure similar events at future times. Another world's show for the Dominion, probably somewhere in the eastern provinces, is being suggested for 1938.

Fisheries Production

Had a Market Value Of Nearly \$20,000,000 Last Year
Canada's fisheries production in the calendar year 1932, as shown by statistics prepared for publication by the Dominion Department of Fisheries and the Dominion Bureau of Statistics jointly, had a market value of nearly \$20,000,000 to be exact, \$25,267,125. Of this total, \$21,763,111 came from sea fisheries production and \$4,194,022 from the inland or freshwater fisheries.

The year's aggregate was \$14,560,173 less than the 1931 total, and the falling off is explained, of course, by the disturbed world conditions which prevailed. Fish were as plentiful as ever in Canada's vast extent of fishing waters but marketing was difficult and prices low. The Department's fisheries figures will climb again as normal world conditions return.

Fisheries production value shows a decrease in each of the provinces and in the Yukon Territory in 1932, although in Alberta there was a drop of only a couple of hundred dollars and the Manitoba decrease was relatively small. By provinces, the market value was as follows:
British Columbia \$9,099,116
Nova Scotia 6,537,943
New Brunswick 2,972,736
Ontario 2,147,690
Quebec 1,815,544
Manitoba 1,204,892
Prince Edward 186,174
Saskatchewan 150,789
Alberta 25,780
Yukon Territory 35,789

Cheaper Than Detective

Berlin Police Furnish Personal Information For Twelve Cent
It costs only 12 cents to find out all about the lady in Berlin. Whereas lovers await (or more often ambitious divorce-chasers) in France have to hire private detectives or bribe janitors in order to ascertain whether she is single, married, divorced, 21, or 18, rich or poor, obliging Berlin police, under new regulations, furnish all the information for 30 pennings.

Being German police, and therefore thoroughness personified, they keep tabs on everybody. And being police, and therefore proverbially unsentimental, they will not divulge the above-mentioned data, but come through with her religion, birthplace, and maiden name.

The lady, if she wants to get even can do the same. She may obtain, for the same fee, the gentleman's full name, profession, parents' name and previous residence. If he has real property, she is entitled to know that too.

To prove that sophisticated Berliners are just as inquisitive as small-town folk, written or personal requests for information of this sort in the past, under more stringent regulations, averaged 500,000 a year.

Keep Eyes On Road

Dangers For Motorist To Relax Vigilance Even For Second

It is dangerous to take the eyes off the road for even a second in this day of high speed driving. If the motorist is driving at thirty miles an hour, his car is going at the rate of forty-four feet per second. If he or another car is coming toward him at the same speed the cars are approaching at the rate of eighty-eight feet per second.

When travelling at sixty miles an hour and approaching another car going at the same speed in the opposite direction, the two cars are coming together at the rate of 176 feet in one second. It is easy to see that in such circumstances such as these it is not safe to have to look for more than a fraction of a second at the speedometer, oil gauge or any other dash device.

Literary In Canada

Slightly More Women Than Men In Canada Can Read And Write
Women have a higher degree of literacy in Canada than men. It was shown in the 1921 census that the survey showed that 95.7 per cent of Canada's male population above the age of 10 could read and write and 95.3 per cent of females.

Ontario had the highest percentage of literacy of any of the provinces, 97.4 per cent, followed by Prince Edward Island with 96.6 per cent. New Brunswick had the lowest percentage, 92.38. The percentages for the other provinces were: Nova Scotia, 95.00; Quebec, 94.5; Manitoba, 95.1; Saskatchewan, 95.3; Alberta, 96.1; and British Columbia, 95.1.

Twenty-three weather stations have been abandoned without any improvement that we can notice.

Will Try It Again

James Molloy, Trans-Atlantic flyer, telephoned to friends in London that he and his wife, Amy, after returning to England by steamship, planned to fly to the United States again, and then carry out their aim to fly as far as possible eastward, hoping to better the long distance flight record. It was expected the flight would be made next year.

Elaborates General Plan For British Community Settlements Under Migration Scheme

Woolies Relic Found

Embedded In Rock Age Is Set At Million Years

Harold Putnam stipendiary magistrate for Truro, Nova Scotia, has a relic which he believes may recall the days of a million years or more ago. Doing to the Salmon River for a flat stone, Robert Peilding found one suitable for a step to Mr. Putnam's garage. On close examination it was found that embedded in the rock was a petrified stick of wood. That the wood has been treated by human hands the exhibit gives every indication.

Judging by the rock, which is said to have been brought from Wallace for a railway bridge at Truro, the age is set at a million years or more and the stick to become embedded in it. It showed that the stick is at least a million years old. Around Great Village are many fossils showing the movements of animals of the age gone by, but the exhibit which Mr. Putnam guards very closely is believed to show the methods and modes of prehistoric humans.

Grooves at equal spaces apart that might have been made by man or machine are discernible and a sort of corrugation lengthwise, the stick gave further evidence that the wood was used for some implement or weapon. A stone cutter will be engaged to cut away a portion of the rock so that more of the petrified stick might be seen.

The stick is at least three inches in diameter and more than ten inches long. The ends are not exposed and it might prove that it was a weapon or a tool of some kind used in the prehistoric ages.

Brighter Prospects

Improved In Business Conditions Sighted In Bank Letter

Momentum attained by business during the second quarter of 1933 has carried several industries to higher levels though July, states the August commercial letter of the Canadian Bank of Commerce.

"It may therefore be expected that complete reports for the past month will show a volume of business a whole to have been maintained at about the June level.

In view of the serious crop damage, the breakdown of the World Economic Conference and recent stock market losses, this stability should be regarded as the best showing possible," the letter continues.

The "what year" opens now with a short new carry-over certainty, the letter continues, but the abnormally large carry-over of old wheat, some 300,000,000 bushels will make up for the shortage of new crop and "Canada will therefore have for the coming 'what year' a normal supply and an exportable surplus practically equal to the exports recorded for the 1932-33 year."

Opposed To Replenishment

His car had been destroyed and was destroyed. It being insured he went at once to the insurance office and demanded his money. He was given a claim form to fill up, and was told he would not get the money but that the car would be replaced.

"Oh!" said he, "if that's the way to do business give me back the premium I paid the other day on my wife's policy."

Declaring opinion in favor of resumption of immigration on a normal scale is the guiding principle throughout Canada, and asserting his plan has the broad support of the Dominion and provincial governments, Brig-General M. L. Horby has circulated a new explanation of his plan for "British community settlements" at a rate of interest.

The Horby plan would send to the Dominion small communities of selected British families, established on areas of proven good mixed-farming land of 5,000 to 10,000 acres in extent, to be sponsored by the existing voluntary migration committees of the counties and towns in the United Kingdom.

Declaring Canada, by the establishment of so great transportation, educational and other services, has already made its share of any 50-50 financing, Brig-General Horby proposes the United Kingdom make necessary loans available to the county, city or town committees here at a rate of interest.

Brig-General Horby declares the objective of the plan is to establish what may be called "Foundation Community Farm Settlements," small communities of selected British families, established on areas of proven good mixed-farming of 5,000 to 10,000 acres in extent. In sponsoring the new settlements by the existing county and town voluntary migration committees, the plan is to bring into play the very strong county and town spirit which exists throughout the United Kingdom.

The ends are not exposed and it might prove that it was a weapon or a tool of some kind used in the prehistoric ages. By purchase a block of from 5,000 to 10,000 acres of well-situated farm land suitable for mixed-farming, 5,000 to 10,000 acres in extent. The land would be held by the community as a perpetuity, it would not be sold to the individual settlers but would be worked by them on a rental basis. The rental being a proportion of the annual produce. Each committee would select a settlement manager or supervisor from this district from which the settlers come and through this manager would subdivide and develop the area to hold suitable farm holdings of varying sizes. The committee would select a field foreman and other staff with local Canadian experience.

In order to safeguard the immigrants' interest in the matter of land tenure, Brig-General Horby has advised the government to be asked to nominate an advisory committee in each province, the function of which would be to act in the initial purchase. The committee would guarantee that none of the settlers would be allowed to become public charges, at least during the first year period during which the settler is acquiring legal Canadian domicile. It is the purpose of the plan that settlers remain permanently tenants on the committee's lands. After proving their ability to farm as tenants they would acquire the ownership of their own. The aim is to have the settler save as much as possible out of his returns during the first three to five years, or longer where necessary.

Soviet Harvesting Impeded

Machinery Repairing Lag and Fuel Shortage Are Behind

Somewhat dismal is Pravda's summary of the news from Russia's southern grain front. It is unpleasantly reminiscent of last summer's harvesting perils.

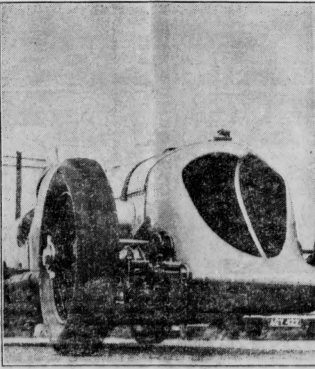

Harvesting machines are reported unequal or badly repaired, with frequent breakdowns and availability for use only a small part of the time. Oil and gasoline deliveries have failed and there are shortages of parts, tools and skilled mechanics.

Some grain has been reaped green; some, fully ripe, has been left to rot. Failure to bind and stack the grain after reaping is frequently noted and there is often a great danger between the reaping and the quantity threshed. The "tempo" of the harvesting is slow and almost all regions are badly behind in their programs. Against all that, reports from everywhere indicate the crop is splendid.

One Of Hitler's Mistakes

Her Hitler's worst performance is that he has systematically crushed all neighboring feeling of the part of Germany towards fellow-nations, and as systematically tried to rouse all the militarist mentality of a people susceptible to militarist suggestions. There are few worse crimes that could be committed in the present situation of the world.—London Observer.

BRITISH DRIVER HOPES TO SET NEW RECORD

Our picture shows Mr. J. Cobb standing in front of his new Napier Raltion car, in which he hopes to maintain an average speed of 130 miles an hour for twenty-four hours at the Brooklands track, London. During tests on the track Mr. Cobb lapped the course at more than 130 miles an hour.

DROUTH AND HEAT TAKES TOLL ON WESTERN CROP

Ottawa, Ont.—Canadian field crops will range from 10 to 57 per cent. below average this year, the Dominion Bureau of Statistics has reported. Drouth and heat took heavy tolls of the crops, especially in Ontario and the prairie provinces.

The most damage during July was done to crops of fax, wheat, barley and oats, the survey showed. The fax crop, on a greatly reduced acreage, was judged to be 43 per cent. of average at July 31. The condition of the wheat crop was shown to be 57 per cent. of average which was the exception of 1931 was the lowest figure at that date in the records of the bureau.

The coarse grains also suffered from drouth, the report stated, and prospects were for about two-thirds of an average yield. Potatoes were placed at 84 per cent. of average. Considering all crops, the yield prospects for 1933 were among the lowest on record for Canada.

The report said for the fifth successive year, conditions on the prairie grew worse in July. Potatoes with conditions at the end of June, the decline amounted to over 26 per cent. Manitoba's decline was over 20 per cent., Saskatchewan 20 per cent. and Alberta's 23 per cent. The report said Alberta's yield would be the lowest in the history of that province.

Dealing with Saskatchewan, the report said: "In every crop district of Saskatchewan, the condition of the spring wheat crop declined during July. During July, damage due to drouth, high temperatures and grasshopper was greatest in crop districts (in southwest corner), three (along the southern boundary and projecting inland toward the west), six and seven (extending across the west-central portion of the province).

On Alberta the report said: "Judged by conditions at July 31, the average wheat yield for Alberta will be one of the lowest, if not the lowest on record for that province. This is mainly due to lack of rain in southern and east-central districts where the wheat acreage is most concentrated. Less than half an average crop is indicated for districts 2, 3, 4, 5, 6 and 7 (taking in the entire southern half of the province), six and seven (extending across the west-central portion of the province). Prospects at July 31 were for below-average crops in the remainder of the province.

Italian Airman Victim Of Seaplane Accident

Motor Trouble Caused Machine To Overturn During Take-off

Horta, Azores.—Two Italian aviators, members of General Italo Balbo's seaplane squadron, were hurt when their plane overturned during the take-off for a practice flight.

The flyers, Capt. Ranieri, the pilot; Lieut. Aquilino, Sergeant Cremaschi, mechanic, and Sergeant Roveri, radio operator, were taken to a hospital. Lieutenant Squaglia died as the result of congestion of the lungs. Motor trouble caused the giant machine to turn over as it was leaving Ponta Delgada, Azores, with 14 others for Portugal and home, after flying thousands of miles from Italy to Chicago and back. In an accident at Amsterdam in the outward journey, one flyer was killed. The ill-fated ship was called the "Itan".

Summer In North Over

Churchill, Man.—Although mid-summer heat waves are taking their toll south of here, fall winds are already blowing across the water. The trappers and birds are moving south. The birds are moving south to the prairie.

Program Is Completed

Churchill, Man.—The week ending August fifth saw the summer program of the Hudson Bay Railway halting and re-conditioning operations practically at an end. During the week the industrial plant was along the Manitoba government townsite, was completed. This spur is about one mile in length.

A bicycle rear light which flashes with the rotation of the rear wheel has been developed in England.

New Public School Readers

To Introduce Change For Western Provinces When Conditions Permit

Manit., Alberta.—Introduction of new readers in public schools of the four western provinces will take place when financial conditions permit. It was decided at the meeting of the inter-provincial education committee.

The committee consists of deputy ministers of education for the four western provinces. They are: Dr. Robert Fletcher, Manitoba; Dr. J. E. Huff, Saskatchewan; Dr. Dr. T. Ross, Alberta; and Dr. S. J. Willis, British Columbia.

Hon. Fernan Brier, minister of education for Alberta, also attended the meeting to discuss educational problems common to the four provinces.

A special committee studied the reader question and decided those books should be introduced in favor of up-to-date books when financial permit. The present readers have been in use for 15 years.

U.S. Grain Code

Proposal For Fair Competition For The Grain Exchanges

Washington.—A proposed code of grain exchange submitted to the farm adjustment administration, fixed minimum margins to be put up virtually all speculative purchases of grain.

Other portions of the proposed code followed generally rules and regulations of the United States national drop in grain prices caused farm officials to ask the exchange officials to change the regulations.

Heretofore, however, the question of margin requirements on purchases has not been definitely fixed, the regulations being that the margin be adequate.

The proposed code calls for regulation by the grain exchanges and the United States national drop in grain prices caused farm officials to ask the exchange officials to change the regulations.

Heretofore, however, the question of margin requirements on purchases has not been definitely fixed, the regulations being that the margin be adequate.

Heretofore, however, the question of margin requirements on purchases has not been definitely fixed, the regulations being that the margin be adequate.

The proposed code calls for regulation by the grain exchanges and the United States national drop in grain prices caused farm officials to ask the exchange officials to change the regulations.

Send Out Strike Ballots

Railway Running Trades Prepare For Months Struggle

Montreal, Que.—Members of the railroad running trades have set September 15 for one of the most notable decisions in the history of Canadian railroads. On that day 24,000 members of the union will be invited to vote on the advisability of striking.

As to the legal step in fighting a second 10 per cent. reduction in wages enforced by both the Canadian National and Canadian Pacific Railways.

Ballots were mailed to engineers, conductors, trainmen, telegraphers and engineers, marking the furthest step taken by any of the railroad unions in their fight against the reduction.

There is no change, it was stated, in the shop trades opposition to the 10 per cent. reduction effected by the railroads at approximately a year's interval.

STUDY OF U. S. RECOVERY PLAN IS URGED HERE

Victoria, B.C.—"A statement in the press that Canadian Business Association in Montreal are making a survey of the direct and indirect results of the United States national recovery act is very interesting," commented Premier S. F. Timmie of British Columbia, recently.

"I think the whole of Canada is watching the present efforts of the country to the south of us to bring back prosperity. They are making very interesting experiments which should be carefully observed and those which appear to be practical and of benefit to Canada might be adopted here."

"The depression has given us a new vision of conditions and standing out prominently in our experience of recent years is the fact that we cannot have real prosperity without a bigger share and steeper revenue from the farmer and the wage earner."

"More orderly planning can play an important part here. The day of excessive profits appears to be past."

Winnipeg, Man.—Canada should study closely the policies involved in the United States national recovery act and their effects, and act at the earliest possible moment in the light of the experience gained, in the opinion of Premier John Bracken of Manitoba, expressed in a statement issued to the Canadian Press recently.

Mr. Bracken said, aside from lessening the barriers to trade, he could see no reasonable alternative to the adoption of some such policies in Canada, modified, where necessary, to meet different conditions, but having the same purposes in view.

CELEBRATES BIRTHDAY

Stanley Baldwin, Lord President of the Council and one of the most popular leaders Great Britain has ever produced, was celebrating his birthday greetings recently when he passed the sixtieth birthday milestone.

Eggs For Northern Port

Two Hundred Dozen Shipped To Chesterfield Inlet

Ituna, Sask.—Fresh eggs that likely would be so fresh when they reach the coast were received from two hundred and ten dozen were consigned to Sergeant Wight and Constable N. Yate at Chesterfield Inlet, N.W.T.

"These eggs, packed in salt, will be food for these policemen in the north this winter. Eggs are scarce up there and fresh eggs unknown that far north."

Constable Yates, an Ituna farm lad, was home before he went north. He never dreamt that he could eat "re-jected" eggs but has learnt how since. Eggs packed in salt will keep good for over a year. They will go via railroad to Churchill and from there will be transported to Chesterfield Inlet, on a Hudson's Bay Company's service boat.

B.C. Orientals Grow Poppies

Mounted Police Said To Be Investigating Matter

Victoria, B.C.—British Columbia Mounted Police are believed to be investigating growth of poppies by Orientals on several tracts of land at Saanich near here. Under the law poppies may be grown but not harvested. Dried poppies brewed into tea have a morphia content of 8 per cent., according to medical authorities.

It is considered likely a test case may develop in anticipation of legislation at Ottawa forbidding growth of the flower altogether.

Winnipeg, Man.—Influenced by the cordial reception given to the north Canadian loan of £15,000,000 in London, Winnipeg may seek to float further issues in the British market.

Mayor Ralph Webb said, Since 1913 Winnipeg has depended on the Canadian market for the foreign capital requirements.

London Wheat Conference

Representatives Of Wheat Exporting Countries To Meet At Canada House

Ottawa, Ont.—Canada House in London, England, will be scene of the important meeting of the representatives of the wheat exporting and importing countries on August 21. It was learned at the office of Sir Hon. Sir George Perley, acting deputy minister. Sir George has arranged, at the request of Prime Minister R. B. Bennett, to have Hon. M. A. Macpherson, provincial treasurer of Saskatchewan, attend the next session, and Mr. Macpherson is now on route.

Mr. Bennett and Hon. G. H. Ferguson, Canadian High Commissioner in London, will attend the meeting, which is called to explore further the problems respecting wheat production and marketing.

It is understood Mr. Bennett will leave for Canada shortly after the conclusion of this meeting, and that he will be accompanied by Mr. Ferguson, who is expected to make a short visit to Ontario.

Canadian Air Pageant

Montreal, Que.—The international flying show, which will be held at the Montreal Light Aerodrome Club, which is arranging the show.

Word was received from the trans-Atlantic flyers that they would take in the women's international speed race which will be one of the main events of the pageant.

Efforts are being made to find a Canadian woman pilot to carry the colors of the Dominion.

Opens New Trail

Aviator Flies From Mount To Vancouver Over Mountains

Blair, B.C.—Almost a bee line to the coast Captain Bill Holland pioneered a new trail from here to Vancouver making the trip in four and half days flying time. Leaving here at 5 a.m., he said goodbye to guiding railway tracks about eight miles west of Banff and headed directly across the mountains.

Up and over historic Simpson Pass, across the Banff Windermere Highway, over the Bridge over the Bow River, over the Selkirk ranges and the "Little Known" lands immediately west of the coast, he flew over the province, then down at Vernon in the Okanagan to refuel his 200-horse-power Boeing biplane, was the first half on Hollister's trip.

The second half took him across the interior plateau and the Cascade range. A line drawn on the map from Blair to Vancouver touches every place mentioned.

A few minutes after 10 a.m. word was received from Blair, B.C., announcing Holland's safe arrival there.

Previous flights to the coast have mainly followed the roundabout routes of the railroad so Captain Holland's feat opens up new possibilities in flying from the prairies to the coast.

Bus Line To Churchill

Motor Bus Service Between The Pas and Northern Port Is Planned

Saskatoon, Sask.—Operation of a motor bus service between The Pas and Churchill during the 1933 navigation season is proposed by the federal department of railways and canals. It was learned here. It is believed transportation will be by motor bus operating on railway tracks.

The service will start August 10 and continue until October 15 and the post office department has made arrangements for weekly postal service between The Pas and Churchill, although intermediate points will not be served.

The mail-bearing bus will leave The Pas each Tuesday at 11 o'clock in the morning to arrive at Churchill the following evening. The bi-weekly mail will leave Churchill each Saturday afternoon or Sunday morning to arrive at The Pas Monday afternoon.

May Not Be Represented

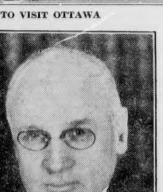

Toronto, Ont.—Canada may not have a Buley team next year, according to Col. F. P. Clarke, Montreal, chief ranger officer at the Ontario Rifle Association met. The Dominion Rifle Association, which annually sends the team to Buley, "is having a hard time to make both ends meet" since governmental grants to the association have been reduced.

Sells Horses

Saratoga Springs, N.Y.—The entire stable of Victor Emmanuel has been sold at public auction at the sales ring and 18 had sold for a total of \$28,400 for an average of \$2,125.

Radio Institute

Toronto, Ont.—The Telegram today states plans have been completed for the establishment of a radio institute in London, Ont., to be in operation early next year.

The Oyen News

About Town and Country

Mr. and Mrs. J. F. Martin and daughter, who have been spending a vacation at Camrose and Pigeon Lake, returned to Oyen last Thursday and left again the following morning for LaPorte, Sask.

Miss Edna Johnston of Rose town, Sask., in the guest of Miss Catharine Wright.

Mr. and Mrs. Donald McKay and family returned home last Thursday evening after spending a vacation at Sylvan Lake.

Mr. M. M. McDonald of Drumheller, was a business visitor in this district last Thursday.

Mr. J. W. Snell returned to Oyen yesterday after a trip to British Columbia, where he has been staking claims in the vicinity of Donald.

Mr. G. P. Freebury has resigned his position as teacher of grades 6, 7 and 8, and will be leaving Oyen shortly to go to Grand Prairie where he has been appointed teacher for the sixth grade.

CARD OF THANKS

Expressing our grateful thanks to all for the kindness shown and sympathy extended in our recent tragic bereavement in the loss of our son Roger; and to our neighbours who helped to combat the fire.

Mr. and Mrs. J. V. Sullivan and family.

Oyen School District No. 3058

TENDERS WANTED

TENDERS for the position of Caretaker of Oyen School for the coming school year will be received up to and including Saturday, August 26th. Secure any information desired from and address tenders to:

F. C. BLISS,
Secretary-Treasurer
Oyen Alberta, August 15, 1933.

Wheat recently delivered in town by Arthur Rothwell of Cappon, was threshed by combine eighty-four days after being sown.

Andrew and Jimmy Lees, Mrs. James Lees and children and Mrs. S. Davis, returned to Oyen this afternoon from Sylvan Lake, where they have been spending a vacation.

Louis Gillespie, who has been confined to his home during the last two week by illness, is reported to be making satisfactory progress.

Excel Items

Messrs R. E. Floyd and C. A. Bishop, Mrs. F. E. Bishop and daughter Ileen are spending a week in the district around Millet.

Miss Mary Byler of Oyen has been a guest at the home of Mrs. R. Bishop.

Excel district is sorry to lose its affable Pool buyer Mr. Mac Kennedy and his family. Mac is going to operate the Pool elevator in New Bridgen this season.

The picnic sponsored by Excel U. F. W. A. on August 9, was a great success. A large crowd was present to witness the sports and enjoy the bountiful picnic supper which followed. Mr. Lorne Proudfoot, M.L.A. spoke at some length after supper, outlining the steps being taken by the government to alleviate the present crisis. He also told of the arrangements made to date re free freight for those desiring to move to other parts. Mr. R. J. Scott, Inspector of schools was present and addressed the gathering, asking for co-operation in combining school districts so that all children in the district may receive a full year of schooling. Both speakers very clearly answered all questions asked. At the conclusion of the addresses, Mr. Charles Harris moved a vote of thanks to the speakers.

A U.F.A. rally will be held in Oyen during the latter part of September, when prominent speakers will be present to discuss the important questions of the day. Everyone will be welcome to attend and express opinions on economic questions.

KENNEDY-SHAVER

A very pretty but quiet wedding was solemnized at St. John's United church, Springfield, Tuesday, August 1st, when Olivia Verlyn Shaver of Aylmer, Ont., daughter of Mr. and Mrs. John Shaver, of Oyen, Alberta, became the bride of Mr. Clarence Gordon Kennedy, of Tonawanda, New York, son of Mr. and Mrs. George Kennedy, of Malahide. The bride was attended by her sister Miss Evelyn Shaver, Aylmer, and the groom by Mr. Chester Baughman also of Aylmer. Rev. G. P. Morley, officiating. The bride was beautifully gowned in flesh silk organdie, with blue sash, large white hat and gloves and carried white American beauty roses. The bridesmaid was dressed in blue silk organdie with white accessories.

After receiving congratulations and the good wishes of their friends the young couple left for a motor trip to Niagara Falls and points east, the bride travelling in a blue and grey

SHOWER FOR BRIDE ELECT

Over seventy people attended a shower given in honor of Miss Verlyn Shaver of Aylmer, whose marriage took place Tuesday morning. The shower was held at the Shaver home, "Erie Lodge", Port Burwell, on Friday, July 28. A very pleasant evening was spent with music and games after which Miss Shaver was called forward and Miss Grace Kerr of Seaforth, read an address and two cousins, Miss Margaret Tiedt and Mrs. Tom Hortner carried in the large basket of gifts. Miss Shaver in a few words gracefully acknowledged the beautiful gifts. Following a delightful supper the guests departed wishing Verlyn many years of happiness.
